FINANCIAL HIGHLIGHTS: STATEMENT OF COMPREHENSIVE INCOME (2)

Notes:

1. The increase in revenue by 23.6% in 2013 was mainly attributable to sales of completed units at SENI Mont' Kiara. No revenue was recognised for The RuMa, in accordance with IFRIC 15.
2. Included in the Other Income are revenue generated by operating assets of US\$14.6 million (2012 : US\$2.6 million). The operating assets are Four Points by Sheraton Sandakan Hotel ("FPSS") and Harbour Mall Sandakan ("HMS"); Aloft Kuala Lumpur Sentral Hotel ("Aloft") and City International Hospital ("CIH") which commenced business in 2013.
3. Operating expenses include operating expenses of the four operating assets of US\$20.1 million (2012: US\$3.6 million) and management fees, administrative expenses and marketing fees.
4. Included in the finance cost are interest on Medium Term Notes ("MTN") and loans related to the four operating assets of US\$9.2 million. The increase in finance cost was mainly attributable to commencement of Aloft and CIH in 2013.
5. Net loss in 2013 was largely due to operating losses of FPSS and HMS totalling US\$ 5.9 million and the pre-opening expenses and operating losses of Aloft of US\$4.4 million and CIH of US\$5.9 million.
6. The loss arising from foreign currency translation for foreign operations was due to weakening of Ringgit against the US Dollars during the year.

The Group adopted IFRIC 15 – Agreements for the Construction of Real Estate, which prescribes that revenue be recognised only when the properties are completed and occupancy permits are issued. This resulted in certain costs being recognised ahead of revenue during the year.

VALUATION METHODOLOGY

- In addition to the disclosure of NAV under accounting standards, which does not allow for upward revaluation of partially completed developments, Aseana provides an estimate of the current project valuation through the calculation of Realisable NAV (RNAV) as follows:

RNAV of Company = Cash at Company + (Net Asset Value of Projects OR Market Value of Projects – Assumed Taxes) + Net Other Assets & Liabilities

- Aseana has valued each project using the following valuation basis for the RNAV calculation:

At Net Asset Value (Cost / Fair Value Basis)	At Market Value (Discounted Cash Flow Method)	At Market Value (Investment / Residual / Comparison Method)
